In reference to the textile product listed below, L.C. Penner Co. maintains that this fabric should be suitable for use in food processing applications. Also, it meets the requirements as stated under Food and Drugs Title 21 (U.S.A.), for textiles used in the processing of foods. Applicable sections are as follows:

<u>Section No.</u>	<u>Section Title</u>
177.1630	Polyethylene phthalate polymers. (polyester)
177,300(b)(3)(xiii)	Resinous & Polymeric coatings, Specifically Triazine-formaldehyde resins and their curing catalysts. [Melamine Resin Finish on the Fabric-applied during the textile finishing process for a stiff hand on the fabric.]

This fabric has not been tested for approval and it has not been approved by the U.S.D.A. for any individual application. If it is necessary to test this fabric for a particular application for U.S.D.A. approval, we will submit the fabric to an independent testing lab. This information will then be forwarded to the U.S.D.A. for approval. All costs for the testing and approval process will be incurred by the customer.
